

Product data sheet

IQ lock M

Mechanical panic lock for simple panic functions on single leaf doors

Product features

- Mechanical self-locking ensures automatic crossbar projection every time the door is closed
- Panic function which opens (even locked) emergency exits in the direction of escape
- Divided cross latch prevents the bolt blocking even under sideload
- Small rear backset and small dimensions of the lock case
- Can be combined with electronic thumbturn cylinders

Application Areas

- Single leaf emergency exit and panic doors (left hand and right hand door)
- Doors along escape and rescue routes
- Fire and smoke protection doors

Product Data Table

Product features	IQ lock M
DIN direction	left / right
Temperature range	-10 °C - 50 °C
Panic function / mechanical self-locking	Yes
Divided cross latch (3 mm gap between latch and bolt)	Yes
Resistant to forcing	10000 N
